

Why are these Little League Board members smiling?

(well, besides the beer)

They just completed preparation for the 2010 season with the Little League® Management Suite (LLMS) web toolkit and support.

LLMS allowed them to manage team building, sponsors and communication, making Little League pre-season and in-season activities well-coordinated and streamlined to be easier and quicker to accomplish.

LLMS

PRE-SEASON

- Player Registration
(Online payments via PayPal; Offline via check)
- Team Manager
(Build teams online)
- Sponsor Solicitation / Registration
(Accounts for easy renewal)
- Tryout Rosters
- Game Schedule Upload

IN-SEASON

- Manager Dashboard
(Team communication)
- Umpires Registration / Self-Scheduling
- Volunteers • Standings
- Sponsor Dashboard
(Build sponsor satisfaction)
- Photo Day / Fundraiser
- Special Event Support
(Tournament/Jamboree online RSVP)

POST-SEASON

- Tournament Blog / Brackets
- League Roster Submission
- Guest Book
(Registration notification)

Intelligent communication.
Form and function.
A better experience.

CALENDAR / DYNAMIC WEBSITE

BOARD MEMBER TOOLS

E-MAIL ANNOUNCEMENTS / NOTIFICATIONS

Support for Board members to get the job done.

LLMS

Baseball is as unique as any sport. Why settle for a one-size-fits-all solution? LLMS has been in development since 2004, with continual enhancements to provide an optimal experience for the Little League community.

The LLMS toolkit is a customized site delivered with localization for each account. Your playing fields and league levels are supported. A league identity is added. If you have a website design you would like to maintain, we can integrate modules that enhance its functionality.

LLMS is a product of Fab 7 Designs initially developed in conjunction with Palo Alto Little League, California. Its open-source architecture ensures portability and server support now and in the future.

SUPPORT

We support new Board members in using the LLMS toolkit and following established processes. Year-to-year account maintenance includes storing/retrieving online resources such as safety plans, FAQs and registration forms.
